Introduction

HIV/AIDS and STDs: Educational Materials

Sexually transmitted diseases (STDs), once called venereal diseases, are among the most common infectious diseases in the United States today. More than 20 STDs have now been identified; they affect more than 13 million men and women in this country each year. HIV is just one of several viruses that can be transmitted through sexual contact.

If an individual has ever been diagnosed with a sexually transmitted disease, he/she is at increased risk for HIV infection, because:

- Many of the sexual behaviors that expose an individual to other STDs can also expose him/her to HIV.
- The sores, blisters, rashes or other tissue changes that can result from infection with an STD, may provide a way for HIV to enter the body.

The materials found in this Standard Search provide information on STDs in general and on the connection between other STDs and HIV/AIDS.

These materials can be used by organizations working to link HIV and other STD prevention efforts, by individuals interested in the effect other STDs can have on someone with HIV/AIDS, and to better understand behavioral risk-factors for various populations.

This database search is drawn from the CDC National AIDS Clearinghouse's Educational Materials Database. The Educational Materials Database is a unique collection of information about hard-to-find educational materials on HIV and AIDS. It includes more than 14,000 descriptions of brochures, directories, manuals, books, posters, reports, studies, teaching guides, sound recordings, videotapes, and other prevention materials. It includes materials for a variety of audiences as well as items that focus on different aspects of HIV infection.

The information in this database search is organized by format; e.g. brochures, posters, and videorecordings. Within each format type, the entries are sorted by year, with the most recent items listed first, and then alphabetically by title. To order a copy of an item listed in the database search, check the **Availability** section of the entry. Some items are available from the Clearinghouse's Document Delivery service or Publications Distribution service, and all are available directly from the designated vendors. The enclosed order form is for Clearinghouse materials **only**.

The Standard Search Series

The Clearinghouse offers the Standard Search Series to provide you with up-to-date information on a variety of key HIV/AIDS-related topics. Each database search is reviewed annually. The searches in this series provide only a sampling of the most recent materials focusing on selected topics. With the exception of a few landmark pieces, only materials published in 1992 or later are included.

If you are interested in locating additional HIV/AIDS information, we invite you to contact the Clearinghouse for a customized search of the Educational Materials Database or one of the other Clearinghouse databases. Reference Specialists are available to help you plan a search strategy.

How To Get Copies Of Materials

To order copies of the materials listed in this search, please contact the organization or individual listed under the **Availability** section of each item. The Clearinghouse provides copies of **only** those materials listed as available from the CDC NAC (see order form, last page). Journal articles can be found in your local university or medical library.

Photocopies of single copies of selected items are also available through our Document Delivery Service for a small handling charge. The Document Delivery Service is important for users who want to obtain copies of materials that are no longer available from their original distributor and for users who would like to see a photocopy of an item available through another distributor before ordering copies. To help you identify these materials, a special note has been included in the availability section of the record of each item, as shown below:

ACCESSION NO: AD0003598.

TITLE: HIV Infection: Early Intervention and Treatment. A New Perspective.
PRODUCER: Center for Special Immunology Corporate Headquarters.
PUBLISHER: Ft. Lauderdale, FL: Center for Special Immunology Corporate Headquarters.
YEAR: 1989.
AUDIENCE: HIV Positive Persons. Persons with AIDS.

ABSTRACT: This brochure discusses early intervention in Human immunodeficiency virus (HIV) infection through antiviral agents, opportunistic infection-prevention measures, and early diagnosis and treatment of HIV-related cancers. Antibody testing is described, particularly the meaning of its results. Persons who test positive are encouraged to seek early care.

AVAILABILITY: Center for Special Immunology Corporate Headquarters 1625 SE 3rd Ave., Ste. 600 Ft. Lauderdale, FL 33316. (305) 767-9444.

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service P.O. Box 6003 Rockville, MD 20849-6003. (800) 458-5231. Price: \$5.00. Use order form.

DESCRIPTION: 1 folded sheet (6 p.): col.

If you would like to order a copy of any item available through the Clearinghouse please use the order form on the last page or call 1-800-458-5231 and press 2 when you hear the options menu.

Book

TITLE: Managing Herpes: How to Live and Love With A Chronic STD.

AUTHOR: Ebel, C.

PRODUCER: American Social Health Association, Publications and Distribution.

YEAR: 1994.

AUDIENCE: Patient Educators. Social Workers. Nurses. Physicians. Sex Partners.

ABSTRACT: This book examines herpes simplex virus (HSV) from the initial outbreak through recurrent episodes, and discusses transmission, symptoms, and treatments. It also includes a discussion of other sexually transmitted diseases (STDs), including HIV. Condom and spermicide use are detailed. The author notes that HIV can be transmitted through a break in the skin created by a HSV lesion. In addition, he dispels fears that HSV turns into HIV or that having HSV means one has a deficient immune system. The author also explains that people who have had an STD are generally placed in a high-risk group for HIV, since it is probable that these people have had unprotected sex. (This material contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: American Social Health Association, Publications and Distribution, P.O. Box 13827, Research Triangle Park, NC 27709. (919) 361-8400. ISBN: 1-885833-01-6; Price: \$17.95 per copy in 11/94.

DESCRIPTION: 223 p.: b&w, ill., gloss.

NOTES: Copyrighted.

ACCESSION NO: AD0017486.

Brochures

TITLE: Herpes.

PRODUCER: American Social Health Association, Publications and Distribution.

YEAR: 1996.

AUDIENCE: General Public, Consumers.

ABSTRACT: This brochure, in a question-and-answer format, gives general information about herpes. It explains how the virus is transmitted, typical symptoms, and what triggers a recurrence of symptoms. Readers are warned to avoid stress and to take precautions not to transmit the virus during sexual intercourse. The brochure explains treatment with acyclovir and the possible complications that can arise during pregnancy; it also explains that herpes does not cause AIDS.

AVAILABILITY: American Social Health Association, Publications and Distribution, P.O. Box 13827, Research Triangle Park, NC 27709. (919) 361-8400.

DESCRIPTION: 1 folded sheet (10 p.): col.

NOTES: Copyrighted.

ACCESSION NO: AD0010714.

TITLE: Will Your Next STD Be HIV?

PRODUCER: Oklahoma Department of Health, AIDS Division.

YEAR: 1994.

AUDIENCE: Sex Partners. Students, Young Adults.

ABSTRACT: This consumer education booklet explains the risk factors for HIV. It emphasizes the fact that HIV is a sexually transmitted disease (STD) and explains how individuals can transmit the virus through sexual intercourse, needle sharing, and to an unborn child in utero. The booklet warns the reader that having syphilis or herpes can make an individual more likely to get HIV. It addresses the prevalence of HIV in Oklahoma. The reader is advised to seek more information, and to obtain the free counseling and testing offered at the Oklahoma Department of Health's clinics.

AVAILABILITY: Oklahoma Department of Health, AIDS Division, 1000 NE. 10th St., Oklahoma City, OK 73117-1299. (405) 271-4636.

DESCRIPTION: 1 folded sheet (4 p.): col., ill.

ACCESSION NO: AD0016677.

TITLE: The HIV/STD Connection.

PRODUCER: North Carolina Department of Environment, Health, and Natural Resources, Communicable Disease Control Section, HIV/STD Control Branch.

YEAR: 1993.

AUDIENCE: Sex Partners.

ABSTRACT: This brochure warns readers that having a sexually transmitted disease (STD) puts one at greater risk of HIV infection. It emphasizes the following connections between STDs and HIV: the sores caused by STDs such as herpes and syphilis facilitate the entry of the HIV virus; HIV weakens the immune system, making any other STDs harder to treat; and STDs switch on the body's immune system, causing HIV to multiply faster. The brochure discusses the three R's of STDs: risk-taking behavior, recognition of symptoms of STDs and HIV, and response, including stopping sexual activity and seeking treatment if an STD or HIV is suspected. It also looks at ways to protect oneself against these infections by practicing safer sex and by not sharing needles.

AVAILABILITY: North Carolina Department of Environment, Health, and Natural Resources, Communicable Disease Control Section, HIV/STD Control Branch, P.O. Box 27687, Raleigh, NC 27611-7687. (919) 733-7301. Free.

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$5.00.

DESCRIPTION: 1 folded sheet (6 p.): col.

ACCESSION NO: AD0015477.

TITLE: Herpes: Scarlet Letters.

AUTHOR: James, J.

PRODUCER: Do It Now Foundation.

YEAR: 1991.

AUDIENCE: Sex Partners.

ABSTRACT: This brochure looks at the symptoms and routes of transmission of the two types of herpes simplex virus. It mentions that men who have herpes sores are more likely to contract HIV through breaks in the skin. Methods of herpes treatment are outlined.

AVAILABILITY: Do It Now Foundation, P.O. Box 27568, Tempe, AZ 85285. (602)736-0599.
Publication no. DIN H104; Price: 40 ¢ in 11/92.

Comic Books

TITLE: Everything You Wanted to Know About AIDS. (translated title)

FOREIGN TITLE: Todo lo que tu Querias Saber del SIDA.

PRODUCER: Consejo Nacional de Prevencion y Control del SIDA.

YEAR: 1993.

LANGUAGE: Spanish.

AUDIENCE: Hispanics. Sex Partners.

ABSTRACT: This comic book presents basic information about AIDS in a question-and-answer format. It covers such points as HIV transmission, myths of casual contact transmission, opportunistic infections, exchange of body fluids, sexually transmitted diseases (STDs), antibody tests, and safer sexual conduct. Correct condom use is described, and guidelines for the use of azidothymidine (AZT) are given. Readers are also referred to a hotline for more information. (This material contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: Consejo Nacional de Prevencion y Control del SIDA, Comercio y Administracion #35, Col. Copilco Universidad, Mexico City, CP 04360, Mexico. 525 658 9251.

DESCRIPTION: 25 p.: col., ill.

ACCESSION NO: AD0014372.

TITLE: Take a Friend's Advice.

FOREIGN TITLE: Las Conquistas de Juan.

PRODUCER: Delmarva Rural Ministries, AIDS Prevention Program. Program for Appropriate Technology in Health.

YEAR: 1990.

LANGUAGE: English. Spanish.

AUDIENCE: Hispanics. Sex Partners.

ABSTRACT: This comic book tells the story of J.J., who wants to become a hot man with the ladies and who doesn't want to use condoms. He first contracts gonorrhea, and since he still refuses to use condoms, he later contracts HIV and eventually dies of AIDS. His death leaves his sex partners wondering if they, too, are infected.

AVAILABILITY: *A photocopy of this material is available from the CDC National AIDS
Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD
20849-6003. (800) 458-5231. Price: \$5.00.*

DESCRIPTION: 2 p.: b&w, ill.

ACCESSION NO: AD0009670.

Fact Sheets

TITLE: Adolescents, HIV and Other Sexually Transmitted Diseases (STDS).
AUTHOR: Biddle, C.; compiler.
PRODUCER: Advocates for Youth.
YEAR: 1996.
AUDIENCE: Social Workers. Educators. Government Agencies.
ABSTRACT: This fact sheet cautions readers that the low number of reported AIDS cases among adolescents is misleading. It cites the 8-10 year incubation period between infection and diagnosis; the probability that one out of every five people with AIDS between the ages of 20-29 was infected as a teen; and the high number of sexually transmitted disease cases in this age group as primary reasons. The fact sheet discusses why HIV is spreading rapidly; how high incidence of STDs poses a major health threat; condom usage; and why high-risk situations make youth vulnerable. It concludes that HIV education in schools has increased but content quality is still lacking.
AVAILABILITY: Advocates for Youth, 1025 Vermont Ave., NW, Suite 200, Washington, D.C. 20005. (202) 347-5700.
DESCRIPTION: 2 p.: mono., refs.
NOTES: Copyrighted.
ACCESSION NO: AD0014169.

TITLE: Herpes: GMHC Treatment Issues Fact Sheet.
PRODUCER: Gay Men's Health Crisis.
YEAR: 1995.
LANGUAGE: English. Spanish.
AUDIENCE: Hispanics. Persons With AIDS.
ABSTRACT: This fact sheet explains the symptoms of herpes simplex I and II, and shingles, which can be more severe in people with HIV. The herpes viruses cannot be killed, but the external sores can be treated with acyclovir. The fact sheet describes prevention techniques like avoidance of sores, and the use of condoms and dental dams. It lists medicines, vitamins, and minerals which may be useful in treating or preventing herpes infections.
AVAILABILITY: Gay Men's Health Crisis, 129 W. 20th St., New York, NY 10011-3629. (212) 807-6655.
A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$5.00.
DESCRIPTION: 2 p.: b&w.
ACCESSION NO: AD0018791.

TITLE: Syphilis Card.
PRODUCER: North Carolina Department of Environment, Health, and Natural Resources, HIV/STD Control Branch.
YEAR: 1993.
AUDIENCE: Sex Partners. Women.

ABSTRACT: This wallet card describes syphilis, its symptoms, its treatment, and its relationship to HIV/AIDS. It also discusses testing for syphilis, HIV, and pregnancy. It gives toll-free hotline telephone numbers.

AVAILABILITY: North Carolina Department of Environment, Health, and Natural Resources, HIV/STD Control Branch, P.O. Box 27687, Raleigh, NC 27611-7687. (919) 733-7301.

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$5.00.

DESCRIPTION: 2 p.: mono.

ACCESSION NO: AD0014339.

Fotonovela

TITLE: I'll Take the Condom.

AUTHOR: Matiella, A.

PRODUCER: Education Training and Research Associates.

YEAR: 1991.

AUDIENCE: Sex Partners.

ABSTRACT: This fotonovela depicts a conversation between three co-workers — Nick, D.J., and Alex. Nick has just been diagnosed with syphilis, and warned to use condoms to prevent future infection with syphilis or HIV. Alex is skeptical, but Nick and D.J. overcome his objections and convince him to use condoms. (This material contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: Education Training and Research Associates, P.O. Box 1830, Santa Cruz, CA 95061-1830. (800) 321-4407. Title no. 074. Price: \$18.00 for 50 copies.

DESCRIPTION: 4 p.: col., ill.

NOTES: Copyrighted.

ACCESSION NO: AD0011831.

Information Packages

TITLE: Facts About STDs.

PRODUCER: U.S. Department of Health and Human Services, Public Health Service, National Institutes of Health, National Institute of Allergy and Infectious Diseases.

YEAR: 1995.

AUDIENCE: General Public, Consumers. Sex Partners.

ABSTRACT: This information package provides basic facts about sexually transmitted diseases (STDs), ways in which they are spread, their common symptoms, and how they can be treated. The package contains an introduction to STDs and a series of fact sheets on the following: chlamydia, genital herpes, gonorrhea, hepatitis, HIV/AIDS, human papillomavirus and genital warts, pelvic inflammatory disease, syphilis, and vaginal infections. Most fact sheets present information on diagnosis, complications, prevention, and research. Also included is a sheet on other important STDs such as chancroid, granuloma inguinale, group B

streptococcal infections, molluscum contagiosum, and human T-cell lymphotropic virus.

AVAILABILITY: U.S. Department of Health and Human Services, Public Health Service, National Institutes of Health, National Institute of Allergy and Infectious Diseases, 31 Center Dr., MSC 2520, Bethesda, MD 20892-2520. (301) 496-5717. NIH Publication No. 92-909 (A-K).

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$6.80.

DESCRIPTION: 10 brochures (38 p.): mono.

ACCESSION NO: AD0017382.

TITLE: Provider Packet on Adolescent HIV/AIDS Medical Management.

PRODUCER: Albert Einstein College of Medicine, Montefiore Medical Center, Department of Pediatrics, Adolescent AIDS Program.

YEAR: 1995.

AUDIENCE: Health Professionals.

ABSTRACT: This information package provides information about the medical management of adolescents with HIV infection. The articles cover the epidemiology of adolescent infection, HIV-antibody testing, medical treatment, clinical trials, psychosocial issues, sexually transmitted diseases (STDs), and risk assessment and reduction. Specific issues that are addressed include condom use, males who have sex with males, lesbian youth, heterosexual females, runaway and homeless youth, and sexual abuse. Substance use, hemophilia and blood transfusions, and congenitally infected adolescents are also discussed. A health risk questionnaire is detailed, which provides information on sexual history, sexual behaviors, and drug use behaviors. An order form for a book aimed at the adolescent reader, which candidly discusses these issues, is included.

AVAILABILITY: Albert Einstein College of Medicine, Montefiore Medical Center, Department of Pediatrics, Adolescent AIDS Program, 111 E. 210th St., NW, 674 Bronx, NY 10467. (718) 882-0023. Free.

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$7.45.

DESCRIPTION: 1 package: contains 5 journal articles, 2 chapter excerpts, 3 resource order forms, 1 program description.

ACCESSION NO: AD0016966.

TITLE: STD Interchange.

PRODUCER: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, Center for Prevention, Division of STD.

YEAR: 1991.

AUDIENCE: Health Professionals. Patient Educators. Planners. Researchers. Educators.

ABSTRACT: This information package contains seven reprints of journal articles, two book chapters, and one report looking at sexually transmitted diseases (STDs) and their

relationship to HIV infection. Some of the topics examined include syphilis, rates of infection in adolescents, Kaposi's sarcoma, STD prevention, HIV-antibody tests, data analysis, trends, primary health care, and condom use.

AVAILABILITY: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, Center for Prevention Division of STD, 1600 Clifton Rd., Atlanta, GA 30333. (404) 639-3311.
DESCRIPTION: 1 information package contains: 7 journal articles, 2 book chapters, 1 report.
ACCESSION NO: AD0010015.

Journal Articles

TITLE: HIV-Positive Women and Their Care.
AUTHOR: Squires, K.
PRODUCER: Test Positive Aware Network.
SOURCE: In: *Positively Aware*; Jan./Feb. 1996.
YEAR: 1996.
AUDIENCE: Health Professionals. Researchers. Women With HIV/AIDS.
ABSTRACT: This article considers the incidence of HIV among women and highlights the importance of regular gynecological examinations to detect HIV and female-specific conditions. The author explains that, following an initial examination, an HIV-positive woman should undergo the same tests as a man to determine where she stands in the course of HIV progression. Complications and treatment are addressed, including vaginal candidiasis, human papilloma virus, cervical cancer, and menstrual problems. All women are advised to have regular Pap smears, pelvic exams, and a general gynecological assessment.
AVAILABILITY: Test Positive Aware Network, 1258 W. Belmont, Chicago, IL 60657. (312) 404-8726.
DESCRIPTION: p. 13-14.
ACCESSION NO: AD0020054.

TITLE: Vaginal Microbicides for Preventing the Sexual Transmission of HIV.
AUTHOR: Stone, A.B.; Hitchcock, P.J.
PRODUCER: Current Science.
SOURCE: In: *AIDS*; Vol. 8, Suppl. 1, 1994. p. S285-S293.
YEAR: 1994.
AUDIENCE: Researchers. Physicians. Women.
ABSTRACT: This article focuses on the use of vaginal microbicides and their importance in prevention strategies against HIV and other sexually transmitted diseases (STDs). Because STDs disproportionately affect women, fetuses, and newborns, there is a need for safe, effective, female-controlled chemical barriers. Microbicides work by inactivating infectious agents in male and female genital fluids. This article discusses efficacy versus toxicity of microbicides, briefly reviews clinical studies, and specifically discusses their efficacy against HIV. It describes desirable characteristics of microbicidal products and examines several surfactant and non-surfactant products as potentially useful intravaginal agents. Delivery systems and research priorities are also addressed.

AVAILABILITY: U.S. Department of Health and Human Services, Public Health Service, National Institutes of Health, National Institute of Allergy and Infectious Diseases, Division of Microbiology and Infectious Disease, Westwood Building, 9000 Rockville Pike, Rm. 749, Bethesda, MD 20892. (301) 402-0443. Attn: A.B. Stone.
Current Science, 20 N. 3rd St., Philadelphia, PA 19106. (215) 574-2266. Attn: P.J. Hitchcock.
NOTES: Copyrighted.
ACCESSION NO: AD0019307.

TITLE: Adolescents, Sexual Behavior and Implications for An Epidemic of HIV/AIDS Among the Young.

AUTHOR: Dickson, N.; Paul, C.; Herbison, P.
PRODUCER: British Medical Association, Professional and Scientific Publications.
SOURCE: In: *Genitourinary Medicine*; Vol. 69, 1993. p. 133-140.
YEAR: 1993.
AUDIENCE: Planners. Researchers. Educators.

ABSTRACT: This article acknowledges the potential for an epidemic of AIDS in the young heterosexual populations of countries which currently have a Pattern I spread of HIV, such as the United Kingdom and New Zealand. The study examines the patterns of sexual behavior, condom use, and sexually transmitted diseases (STDs) among young New Zealanders, and the characteristics of those with many sexual partners. The subjects, a cohort of young people enrolled in a longitudinal study, answered computer-presented interview questions about sexual behavior. The results indicate substantially higher rates of sexual activity than reported in a comparable survey of 20 years ago. Condom use decreases with increasing numbers of partners for young women and presents no association for young men. The study asserts that both men and women reported more STDs as their numbers of sexual partners increased. The authors conclude that patterns of sexual behavior, condom use, and occurrence of STDs in the sample provide cause for concern about a possible HIV epidemic and the spread of STDs among heterosexual young people. They comment further about the need for programs to promote safer sex among young people.

AVAILABILITY: University of Otago Medical School, Department of Preventive and Social Medicine, P.O. Box 913, Dunedin, New Zealand. Attn: Dr. Nigel Dickson.
NOTES: Copyrighted.
ACCESSION NO: AD0014549.

TITLE: How to Make Love to A Man (Safely): AIDS and Sex and You: The Latest Medical Facts.

AUTHOR: Penney, A.
SOURCE: In: *Self*; May 1993. p. 118-120, 170-172.
YEAR: 1993.
AUDIENCE: Sex Partners. Women.

ABSTRACT: Background information about HIV and its transmission, including the risk levels of various sexual practices and communication between sex partners about condom use, is discussed in this article. The author explains that having other sexually transmitted diseases (STDs) can weaken the system, making it more susceptible

to HIV infection. She cautions against having multiple partners, and points out that engaging in sex while intoxicated or on drugs can result in impaired judgment. Ways of initiating conversations about condom use are suggested. The author encourages women to buy condoms and to take control of their health and their bodies. (This material contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: Conde Nast Publications, Incorporated, Conde Nast Bldg., 350 Madison Ave., New York, NY 10017.
NOTES: Copyrighted.
ACCESSION NO: AD0013692.

TITLE: Pelvic Inflammatory Disease: Research Directions in the 1990s.
PRODUCER: American Venereal Disease Association.
SOURCE: In: *Sexually Transmitted Diseases*; Vol. 18, no. 1. 19 p. (p. 46-64): b&w, sources, refs.
YEAR: 1991.
AUDIENCE: Planners. Researchers.
ABSTRACT: This reprint of a journal article discusses Pelvic Inflammatory Disease (PID) as a sexually transmitted disease (STD) common to women. It looks at symptoms, diagnosis, methods of treatment, means of prevention, and research into the disease. PID is often present in women with AIDS. The article looks at the epidemiology of PID, risk factors, and risk markers.
AVAILABILITY: U.S. Department of Health and Human Services, Public Health Service, National Institutes of Health, National Institute of Allergy and Infectious Diseases, 31 Center Dr., MSC 2520, Bethesda, MD 20892-2520. (301) 496-5717.

Manuals

TITLE: Integrating STDs and AIDS Services Into Family Planning Programs: Training Community Workers.
PRODUCER: Centre for Development and Population Activities.
SERIES: CEDPA Training Manual Series; Vol. SD-1.
YEAR: 1995.
AUDIENCE: Planners. Social Workers. Community Service Professionals. Educators.
ABSTRACT: This manual presents the curriculum for a 5-day training workshop in integrating services for sexually transmitted diseases (STDs) and HIV/AIDS into family planning programs. It is designed to provide community-based organizations (CBOs) and clinic staff (primarily in developing nations) with skills in risk assessment, integrated counseling, and counseling for sexual behavior change. The manual is based on the premise that information alone will not effect behavioral change. Throughout the sessions, STD/HIV/AIDS counseling is placed within the context of a family planning program. The workshop incorporates role play, case studies, small group work, and discussion. Also included are suggested objectives and a timetable for conducting training of trainers (TOT) workshops for those who will train the community-based workers. The manual is divided into 13 sessions that address attitudes about HIV/AIDS/STDs, communication and counseling skills, motivating behavior change, cultural and gender issues, basic

STD facts, and issues of confidentiality. The manual also contains a list of resources, registration forms, and workshop evaluation forms.

AVAILABILITY: Pact Publications, 777 United Nations Plaza., Fl. 6, New York, NY 10017. (212) 697-6222.

TITLE: Self Care Manual for the HIV Infected Person.

AUTHOR: Aaron, E.

YEAR: 1992.

AUDIENCE: HIV Positive Persons.

ABSTRACT: This self-care manual features practical information for people infected with HIV. Using a checklist format, with simple directions, it describes: 1) symptoms that should receive medical attention; 2) food safety (storage and preparation); 3) safer sexual practices; 4) diarrhea; 5) women's issues (yeast infections, PAP tests, pregnancy, sexually transmitted diseases); 6) skin care; 7) drug and alcohol use; 8) fever; 9) home medical supplies; and 10) infection control techniques. HIV infection, its transmission, its testing, and its treatment are also covered.

AVAILABILITY: Erika Aaron, 3216 Logan St., Philadelphia, PA 19141. (215) 848-1744.

TITLE: Recruiting and Training the Peers AIDS Educators.

PRODUCER: District of Columbia Commission of Public Health, Department of Human Services, Agency for HIV/AIDS, Division of HIV Prevention.

YEAR: 1991.

LANGUAGE: English. Spanish.

AUDIENCE: Educators. Administrators. Hispanics.

ABSTRACT: The manual is divided into two segments, one written in English, the second in Spanish. The English segment covers the following: recruiting and training AIDS educators, process objectives, impact objectives, and implementation of AIDS education sessions. In the Spanish portion, educational materials used to reach and educate Latino community educators are listed. The purpose is to increase understanding and reduce fear related to HIV/AIDS. The training objective includes the history of the District of Columbia AIDS program and strategies implemented to promote AIDS education. There is a brief report on the origins of the disease. A complete and detailed accounting of facts and dates is given in the epidemiology section. A very specific description of HIV is given in the virology section. A section on immunology explains the immunological system as it relates to AIDS and other diseases. HIV transmission routes are divided into sexual and non-sexual vectors, and the physiology of certain parts of the body is explained. The theory of the co-factor postulates that AIDS does not happen all of a sudden, but that other factors that weaken the immune system must be present. A guide to

sexual activities is given, divided into: sex without risk, sex with a possible risk, and high-risk sexual practices. The manual includes diagrams of the male and female sexual organs, a list of sexually transmitted diseases (STDs), and a vocabulary. (This material contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: District of Columbia Commission of Public Health, Department of Human Services, Agency for HIV/AIDS, Division of HIV Prevention, 717 14th St., NW., 6th Fl., Washington, D.C. 20005. (202) 727-2500.

Posters

TITLE: Today, Almost One Million Americans Are Infected With HIV, How's It All Going to End?

PRODUCER: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention.

SERIES: America Responds to AIDS.

YEAR: 1992.

AUDIENCE: Sex Partners.

ABSTRACT: This poster urges viewers to re-consider sexual behaviors that put them at risk for HIV infection and other sexually transmitted diseases (STDs). It explains safer sexual conduct and how it can prevent the spread of HIV and other STDs. These materials feature a black-and-white photograph of a young man and woman talking and smiling at each other.

AVAILABILITY: CDC National AIDS Clearinghouse, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. CDC NAC Inventory no. P711 (poster); Price: 10¢.

DESCRIPTION: 1 poster: b&w, ill., 16 x 22 in.

ACCESSION NO: AD0011143.

TITLE: Some People Think They Come of Age When They've Been Burnt by Gonorrhea, But if They've Been Burnt by AIDS They May Never Come of Age.

PRODUCER: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention.

SERIES: America Responds to AIDS; Parents and Youth Campaign.

YEAR: 1989.

AUDIENCE: Adolescents. Students, Young Adults.

ABSTRACT: This poster makes the point that HIV infection, unlike other sexually transmitted diseases (STDs), is incurable. National hotline numbers are given.

AVAILABILITY: CDC National AIDS Clearinghouse, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. CDC NAC Inventory no. P146; Price 10¢

Reports

TITLE: HIV/AIDS: The Evolution of the Pandemic, the Evolution of the Response.

PRODUCER: U.S. Agency for International Development, Bureau for Research and Development, Office of Health, HIV/AIDS Division.

YEAR: 1993.

AUDIENCE: Advocates. Administrators. International Agencies.

ABSTRACT: This report presents the U.S. Agency for International Development's (USAID's) program for prevention and control of HIV infection. The book traces the evolution of the pandemic in the developing world, highlights data on HIV seroprevalence among urban populations of developing countries, and describes USAID's HIV prevention initiatives from 1987 to 1992. The AIDS Public Health Communications (AIDSCOM) and AIDS Technical Support (AIDSTECH) programs perform biomedical and biobehavioral research, network with private voluntary organizations, and collaborate on multilateral assistance with the World Health Organization. USAID's current program objectives are to decrease the sexual transmission of HIV in a select

number of developing countries. The Agency seeks to integrate multiple interventions, focusing on three strategies: 1) research and communication to change high-risk behavior; 2) improving prevention, diagnosis, and treatment of sexually transmitted diseases associated with increased vulnerability to HIV infection; and 3) increasing condom use. Appendix A provides a sampling of USAID-funded projects underway in Africa, Asia, Latin America, and the Caribbean in 1992. Appendix B presents USAID's fiscal year 1992 funding obligations for HIV/AIDS prevention activities.

AVAILABILITY: U.S. Agency for International Development, Bureau for Research and Development, Office of Health, HIV/AIDS Division, Arlington, VA 22209. (202) 647-4330. DOE # PNABR915. Price: \$7.28.

A photocopy of this material is available from the CDC National AIDS Clearinghouse Document Delivery Service, P.O. Box 6003, Rockville, MD 20849-6003. (800) 458-5231. Price: \$7.65.

DESCRIPTION: 55 p.: col., ill., appendixes, graphs, maps, tables.

ACCESSION NO: AD0014887.

TITLE: **Characteristics of, and HIV Infection Among, Women Served by Publicly Funded HIV Counseling and Testing Services—United States, 1989-1990.**

EDITION: March 29, 1991.

PRODUCER: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention.

SOURCE: In: *Morbidity and Mortality Weekly Report*; Vol. 40, no. 12. p. 195-204.

YEAR: 1991.

AUDIENCE: Health Professionals. Planners. Social Workers. Federal Agencies.

ABSTRACT: This report looks at monitoring of publicly funded voluntary counseling and testing programs that serve women. It shows the disproportionate impact of the HIV epidemic on minority populations in the United States. Since the study reflects women who receive public services, however, they cannot be considered representative of the U.S. population as a whole. The report says that because of the high prevalence of AIDS among minority groups, community-based outreach programs should actively encourage them to seek HIV prevention services. It also suggests a connection between syphilis and heterosexual transmission of HIV.

AVAILABILITY: U.S. Government Printing Office, P.O. Box 371954, Pittsburgh, PA 15250-7954. (202) 512-1800. HHS Publication no. (CDC) 91-8017; Approximate price range per copy: Under \$5; Approximate yearly subscription: \$50-\$100.

Videorecordings

TITLE: **Learning to Live With Herpes Viruses and HIV.**

PRODUCER: Glaxo Wellcome, Incorporated, Advocacy Relations.

YEAR: 1994.

AUDIENCE: HIV Positive Persons.

ABSTRACT: This video is a collection of interviews with health professionals and patients about herpes and HIV. The first portion focuses on the prevalence of coincident HIV and herpes and the various types of herpes virus. The transmission of herpes is also reviewed. The herpes virus tends to be recurrent. While it can be controlled with a medication, known as acyclovir, herpes cannot be cured. The signs and symptoms of herpes are described and the importance of early treatment is emphasized. People with HIV tend to have more frequent outbreaks of herpes, and these outbreaks last longer than those in their HIV-negative counterparts. Therefore, physicians recommend that HIV-positive persons with herpes remain on a prophylactic dose of acyclovir.

AVAILABILITY: Glaxo Wellcome, Incorporated, Advocacy Relations, 5 Moore Dr., Research Triangle Park, NC 27709. (919) 248-3000.

DESCRIPTION: 1 video cassette (14 min.): col., ½ in. (VHS).

NOTES: Copyrighted.

ACCESSION NO: AD0018644.

TITLE: Sex, Drugs & HIV.

EDITION: 2nd edition, 1991.

AUTHOR: Kesden, B.

PRODUCER: O.D.N. Productions, Incorporated.

YEAR: 1991.

AUDIENCE: General Public, Consumers. Adolescents. Persons Practicing High Risk Behavior. Students, Young Adults.

ABSTRACT: This videorecording, hosted by actress Rae Dawn Chong, gives young people the information they need to help them make informed choices about sex and HIV infection. Through a series of vignettes, the viewer is informed about behavioral factors which can and cannot result in the transmission of HIV. Among the factors discussed are safer sex practices, casual contact transmission, IV-needle sharing, and risky behaviors, as well as sexually transmitted diseases (STDs) and how to prevent them. Sexual abstinence is recommended; for those persons who do engage in sexual intercourse, condom use is urged.

AVAILABILITY: Select Media, Incorporated, 60 Warren St., New York, NY 10007. (212) 732-4437. Price: \$225.00.

SPONSOR: Carter-Wallace, Incorporated (Non Government). Maurice Falk Medical Fund (Non Government). Charles H. Revson Foundation (Non Government).

DESCRIPTION: 1 video cassette (19 min.): sd., col.; ½ in. (VHS).

ACCESSION NO: AD0009976.

TITLE: Streetwise Women.

PRODUCER: Youth Link-Inner City.

YEAR: 1990.

AUDIENCE: Educators. Prostitutes, Sex Workers. Sex Partners. Lesbians. Women.

ABSTRACT: In this videorecording, female sex workers discuss several topics related to HIV/AIDS. Topics include injection drug use, sexually transmitted diseases (STDs), and negotiating safer sexual conduct with clients and personal partners. Use of condoms and dental dams are demonstrated, and the importance of safer sexual conduct in both heterosexual and lesbian relationships is noted. (This material

contains sexually explicit language and/or pictorials that may offend some readers/viewers.)

AVAILABILITY: Youth Link-Inner City, 151 Gerrard St., E, Toronto, M5A 2E4, Canada. (416) 922-3335.
DESCRIPTION: 1 video cassette (15 min.): sd., col.; ½ in. (VHS), plus manual.

CDC National AIDS Clearinghouse

MATERIALS ORDER FORM

How to Order

This form is for ordering materials that are available from the CDC National AIDS Clearinghouse. Items available from the Clearinghouse have the CDC National AIDS Clearinghouse in bold print in the availability section. To obtain copies of materials available from other sources, please contact the organization source listed in the availability field of each item.

Each item available through the Clearinghouse has a unit price (to cover shipping and handling) or is available free of charge. Prices are noted in the availability section of each item.

Free Materials

Use this section to order items that are marked "FREE." You may order as many free titles as you wish.

Note: Most have limits on the number of each item that you can order.

List the order numbers, titles, and quantities of items here:

Order No.	Title	Quantity	Price
_____	_____	_____	FREE
_____	_____	_____	FREE
